

# MDR's School Spending Update

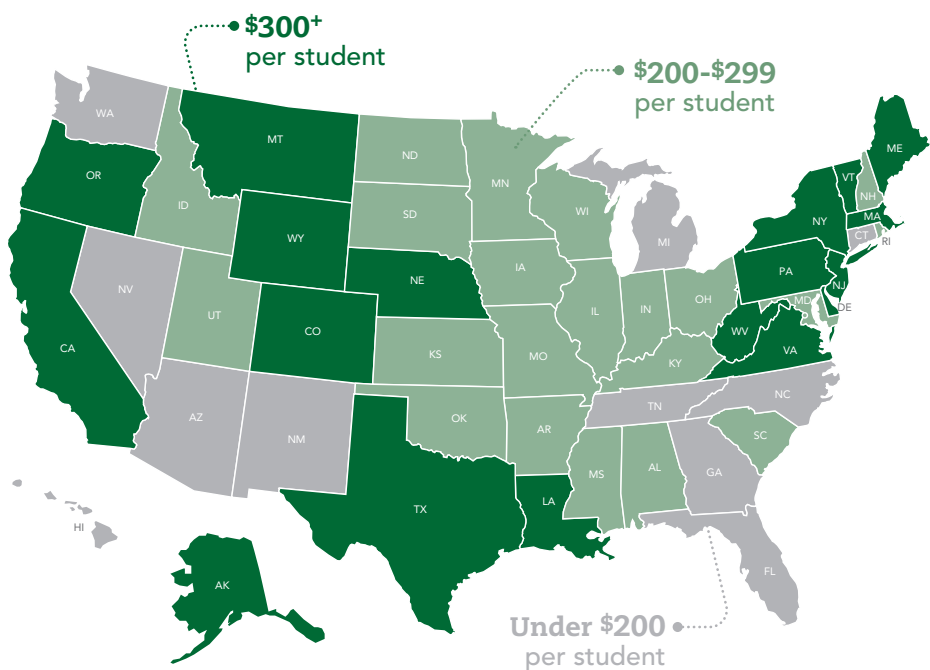

2017-2018 school year

Data reflects spending during the 2017-2018 school year, representing actual dollars spent (expenditures) rather than estimates of future spending (budgets).

## All Instructional Materials (AIM)

# \$13,031,181,706

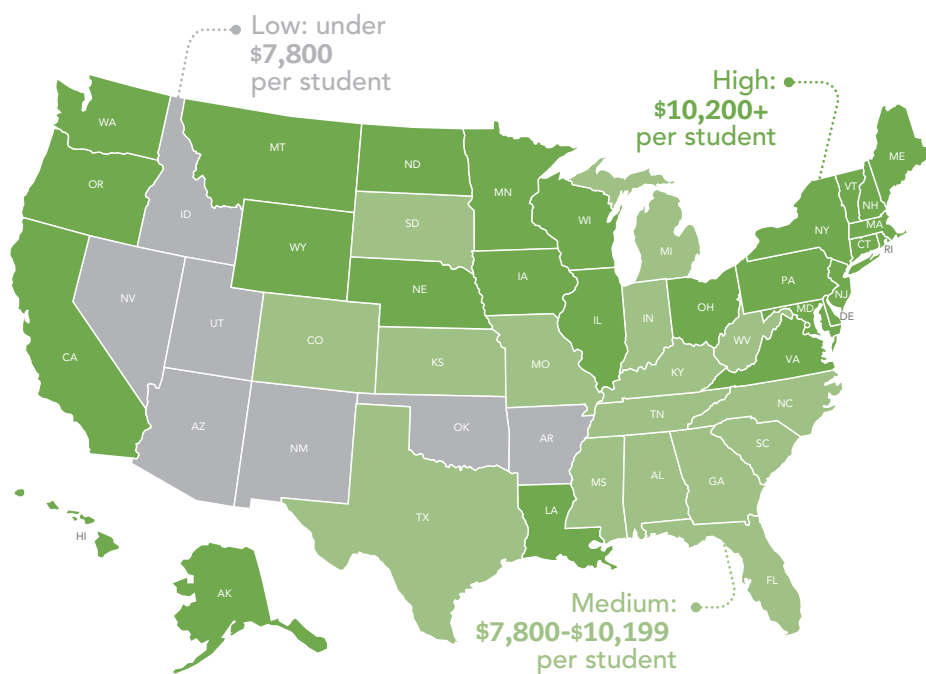

AIM details how much schools spend on all supplies and materials used for instructional purposes. Educational media supplies and software are included. Hardware technology is not included.

## Current Expenditures

# \$544,241,047,466

Current Expenditures reflect the total operating cost for the district and include the functions of instruction, support services, and food service. Capital outlay, pupil transportation, and debt services are not included.

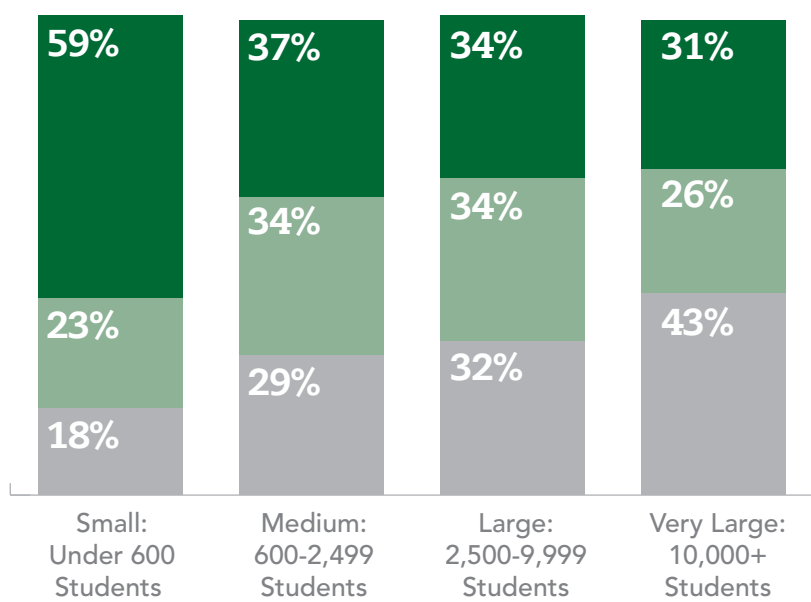

# \$268

per student national average

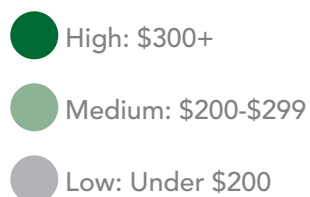

# \$11,192

per student national average

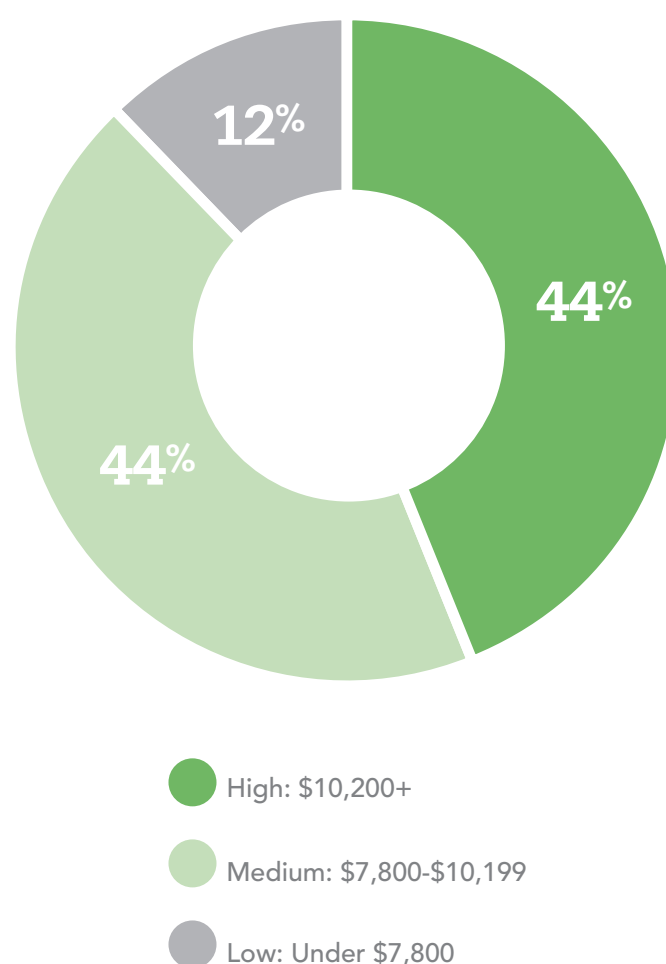

## Per Student AIM Expenditure by District Enrollment

Over half of small districts spend the highest amount on AIM (\$300+), and 42% of very large districts spend the least on AIM (under \$200).

## Percentage of Schools by Per Student Current Expenditure Levels
