

MDR's School Spending Update

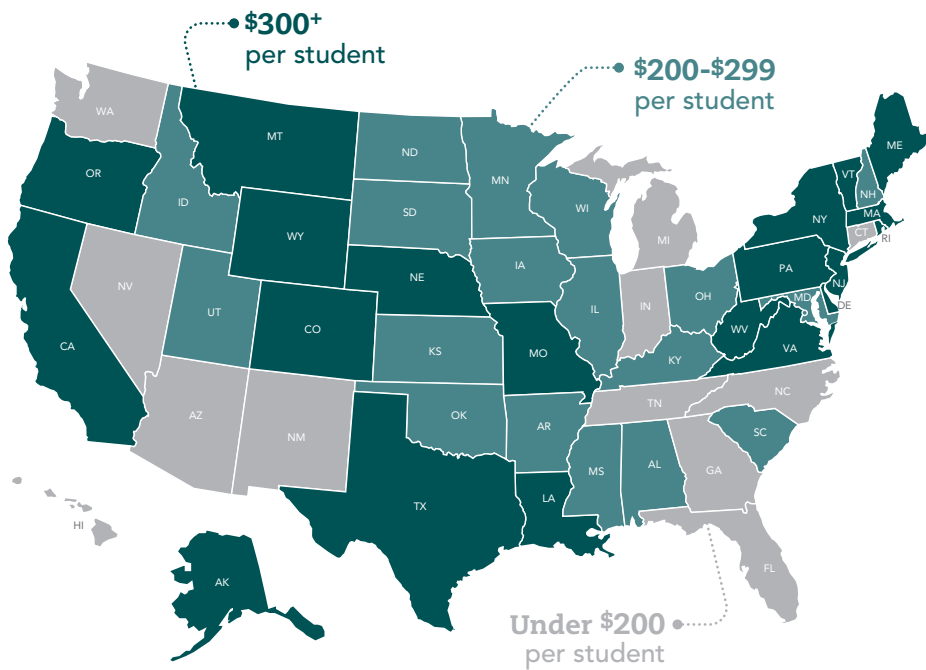

2018-2019 school year

Data reflects spending during the 2018-2019 school year, representing actual dollars spent (expenditures) rather than estimates of future spending (budgets).

All Instructional Materials (AIM)

\$ 13,555,282,026

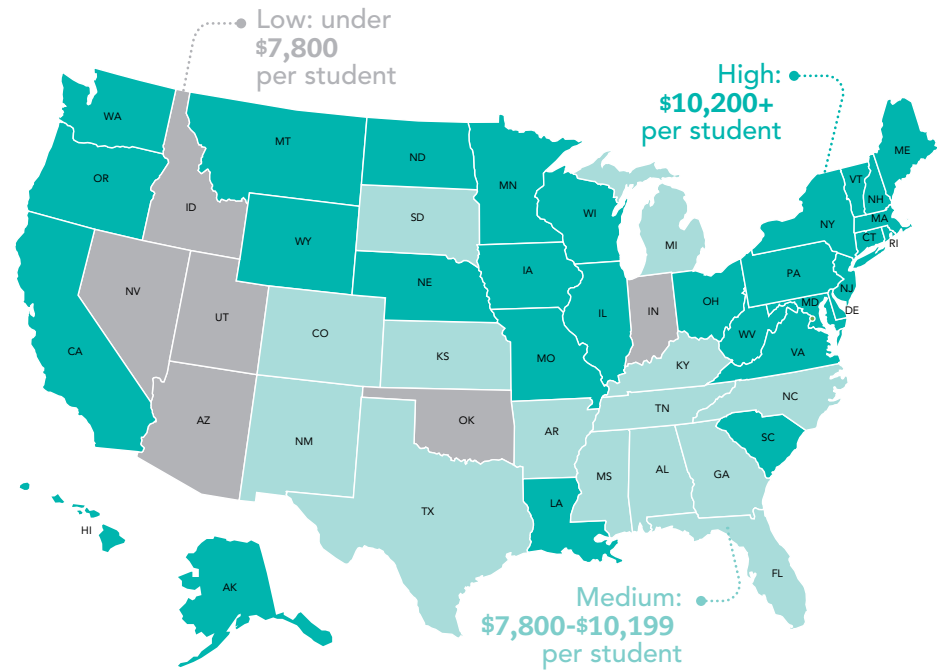

AIM details how much schools spend on all supplies and materials used for instructional purposes. Educational media supplies and software are included. Hardware technology is not included.

Current Expenditures

\$ 556,431,598,506

Current Expenditures reflect the total operating cost for the district and include the functions of instruction, support services, and food service. Capital outlay, pupil transportation, and debt services are not included.

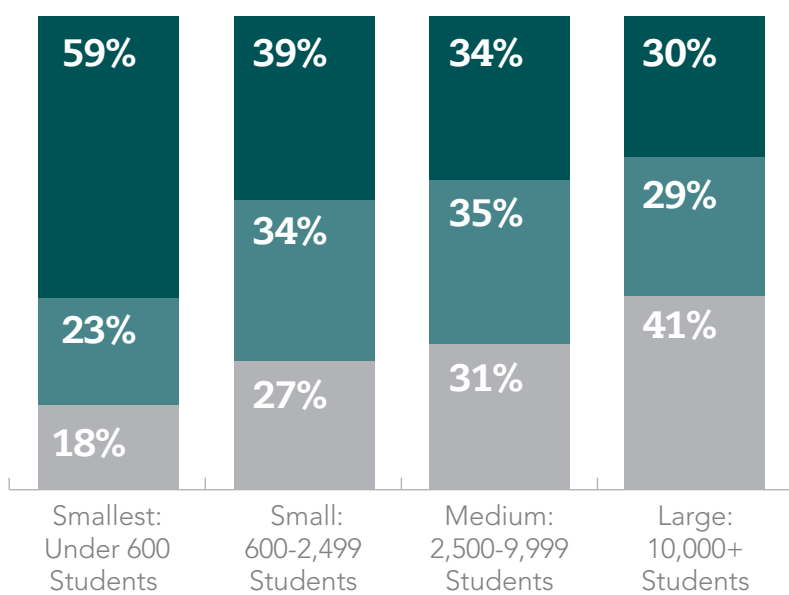

\$279

per student national average

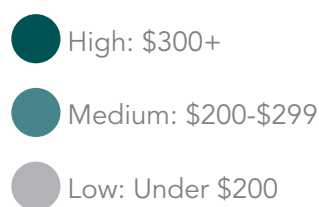

\$11,453

per student national average

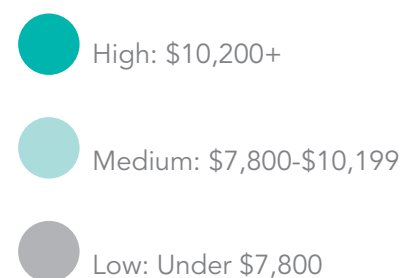

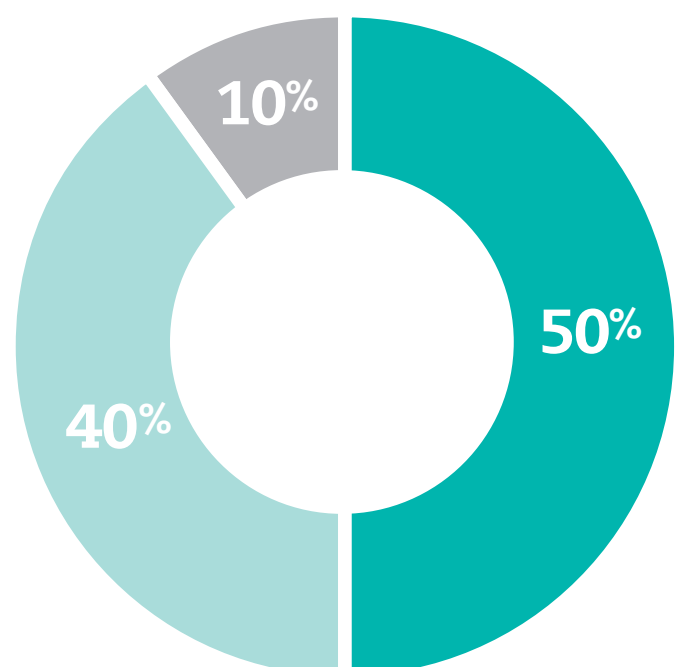

Per Student AIM Expenditure by District Enrollment

Over half of the smallest districts spend the highest amount on AIM (\$300+), and 41% of large districts spend the least on AIM (under \$200).

Percentage of Schools by Per Student Current Expenditure Levels
