

# MDR's School Spending Update

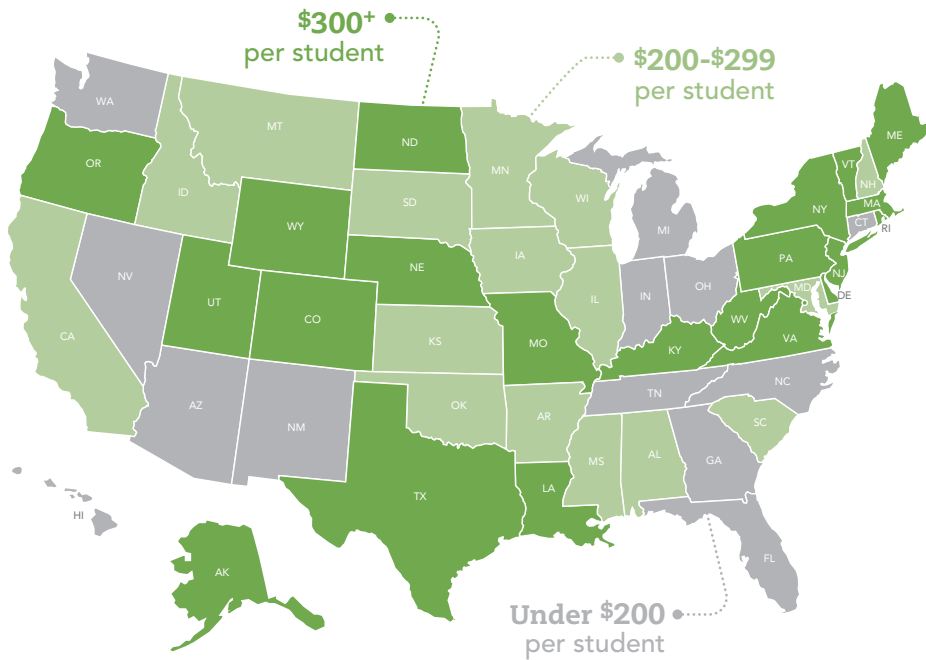

**2019-2020 school year**

Data reflects spending during the 2019-2020 school year, representing actual dollars spent (expenditures) rather than estimates of future spending (budgets).

## All Instructional Materials (AIM)

**\$ 13,645,205,815**

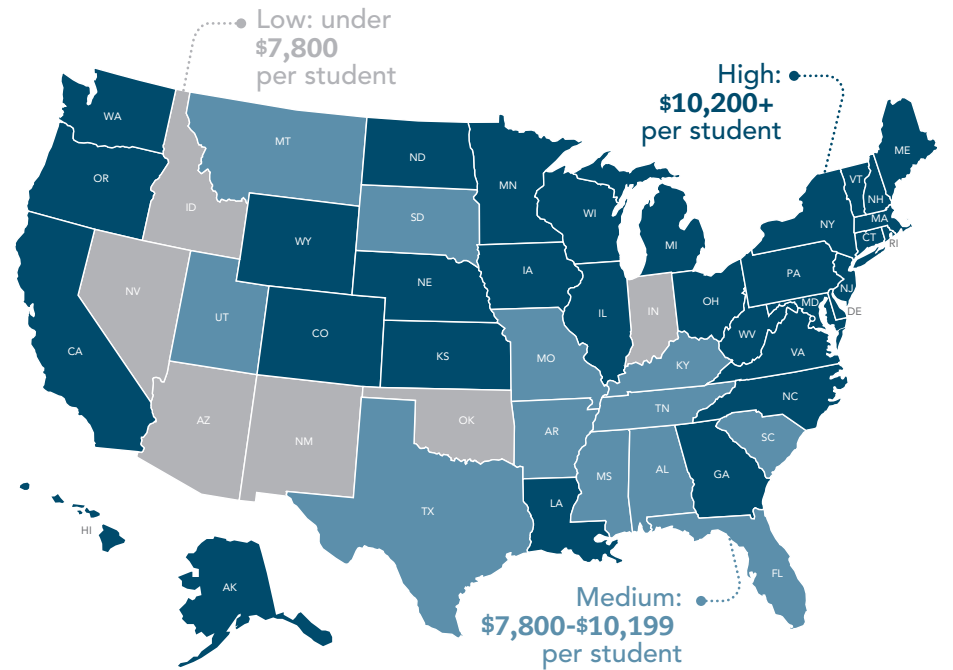

AIM details how much schools spend on all supplies and materials used for instructional purposes. Educational media supplies and software are included. Hardware technology is not included.

## Current Expenditures

**\$ 578,004,616,353**

Current Expenditures reflect the total operating cost for the district and include the functions of instruction, support services, and food service. Capital outlay, pupil transportation, and debt services are not included.

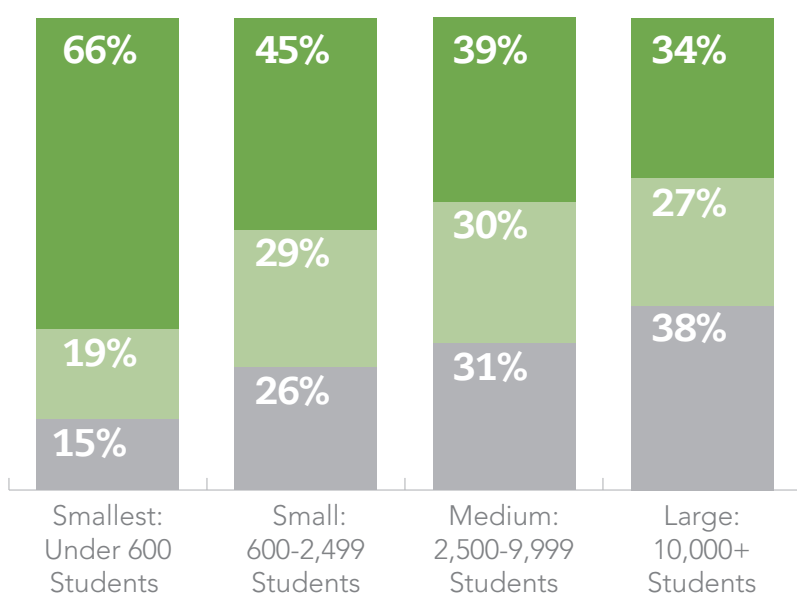

**\$281**

per student national average

**\$11,884**

per student national average

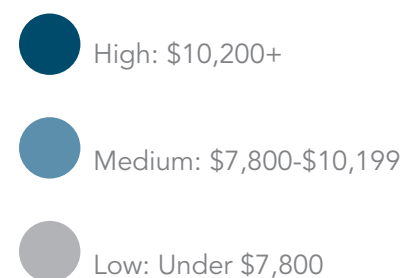

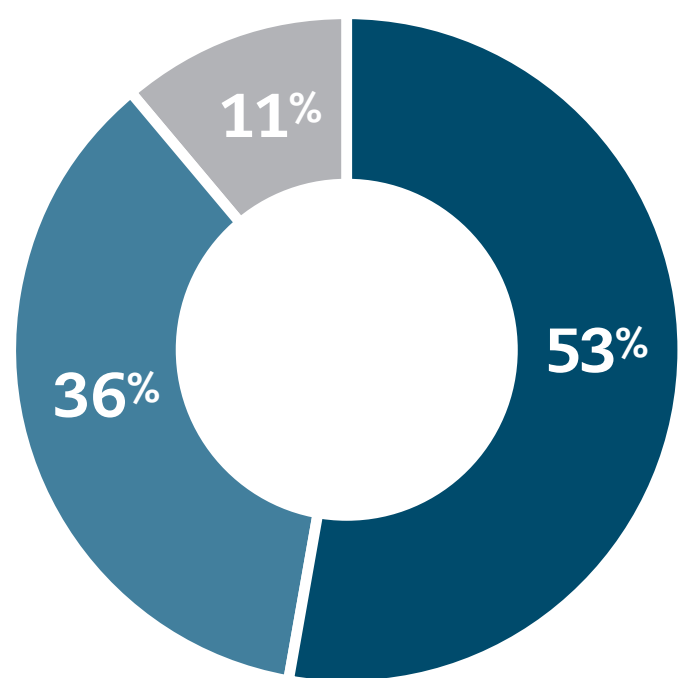

## Per Student AIM Expenditure by District Enrollment

Two-thirds of the smallest districts spend the highest amount on AIM (\$300+), and 38% of large districts spend the least on AIM (under \$200).

## Percentage of Schools by Per Student Current Expenditure Levels
